Hubert Jędrzejek

Senior Laravel developer, legacy modernisation, Wrocław, Poland

Fifteen-plus years of PHP. I modernise legacy systems step by step, without a risky rewrite from scratch; open to a long-term Laravel contract and to smaller projects alongside it.

Experience

Mar 2023 – present

Senior Laravel developer

ESCOLA S.A., remote

Modernising a 40-year-old mainframe system into Laravel for a US organisation with hundreds of thousands of users and hundreds of millions of records: no documentation, no test environment and no room for downtime.

- Migrating the system gradually with the strangler fig pattern, with no operational downtime.
- Built the data synchronisation layer between the old and the new system; designing the Laravel architecture for migrated modules.
- Reverse-engineering undocumented business logic from code and data and through domain discovery workshops.

Laravel, PHP, Legacy modernisation, Strangler fig, Data migration

Sep 2015 – Mar 2023

Senior PHP developer

FINGO sp. z o.o., Wrocław

- Built a sterilisation verification management system for the healthcare sector from the ground up: shipment tracking, returns handling, integrations with payment providers, courier APIs, accounting systems and business registry data (Laravel, Laravel Nova).
- Migrated a legacy Drupal application to Laravel for the automotive sector and built a vehicle data processing layer handling both SOAP and REST APIs (Laravel, Lumen).
- Developed banking reporting tools and a library for managing multiple database systems in FINGO's internal products.

Laravel, Laravel Nova, Lumen, PHP, REST, SOAP

- Jul 2014 – Dec 2014 **PHP developer**
SMT Software, Wrocław
- Developed a workforce management system for a UK umbrella company serving temporary workers: payroll, insurance, tax settlements with HMRC and daily job assignments across multiple work sites (Zend Framework).
- PHP, Zend Framework, REST
- Mar 2013 – Jun 2014 **PHP developer**
Grupa Unity, Wrocław
- Built backend features and custom modules for a premium interior design online store and an integration with Sales Manago for marketing automation; took part in code reviews (PrestaShop, Zend Framework).
- PHP, PrestaShop, Zend Framework
- Mar 2011 – Feb 2013 **PHP developer**
TMSolution, Wrocław
- Built IVR applications on Asterisk, frontend and backend, including internal ExtJS component libraries; contributed to a B2B barter exchange platform where businesses trade goods and services for virtual currency.
- PHP, Asterisk, ExtJS

Projects

wibremarena.pl (<https://wibremarena.pl>)

Full redesign of the website of Wibrem Arena, a climbing gym in Wrocław (September 2026): pricing, sections, courses, birthdays. Hosted on my own VPS with Coolify; WordPress today, moving to Laravel once the booking system ships.

WordPress, Coolify, VPS

Class booking system for Wibrem Arena

Booking of one-off classes against an instructor schedule, in progress since September 2026 in Laravel and Vue as the first module of a climbing-gym management system.

Laravel, Vue, Coolify

Skills

Legacy modernisation and data

Gradual migration with no downtime: strangler fig, data synchronisation layers, reverse-engineering business logic from code and data, moves from mainframe and Drupal to Laravel. Databases from the SQL Server side (MCITP and MCTS certificates).

Strangler fig, System migration, Data synchronisation, Reverse engineering, SQL Server

Backend

Daily: PHP and Laravel. Regularly: Laravel Nova, Lumen, REST and SOAP integrations. Familiar with: Zend Framework.

PHP, Laravel, Laravel Nova, Lumen, REST, SOAP, Zend Framework

Frontend, tooling and AI

Regularly: Vue. Daily: Claude Code, for writing tests, reviewing code and writing production code. Hosting for my own projects: Coolify on a VPS.

Vue, Claude Code, Coolify, WordPress, JavaScript, HTML5, CSS3

Certificates

Feb 2014	Zend Framework: Advanced Course Perforce Zend
Feb 2014	Zend Framework: Fundamentals Course Perforce Zend
Dec 2012	MS: Programming in HTML5 with JavaScript and CSS3 Microsoft
May 2010	MCTS: SQL Server 2008, Database Development Microsoft
Mar 2010	MCTS: SQL Server 2008, Implementation and Maintenance Microsoft
Mar 2010	MCITP: Database Administrator 2008 Microsoft

Set in Inter and JetBrains Mono. 2026.
